

## **GPS Accessories to Make Your Life Easier**

### ***Protect and Enhance the Functionality of Your GPS***

Garmin produces a wide range of accessories to help you get the best from your GPS. The most commonly used of these are explained below. Your Garmin dealer should be your first point of call for any specialist needs you may have as they should have the complete catalogue to refer to. Make sure that you take your GPS with you or are sure of the exact model to ensure that any accessories you may choose are compatible.

#### **Belt Clips**

Some GPS come fitted with these as standard. The belt clip provides a secure method of attaching your GPS to a belt or to a rucksack. The GPS can be quickly detached by pressing a button. Two versions are available, a belt clip with a new back including a locating button and without the back.

#### **GPS Cases**

These come in a variety of forms. Some have a clear window so that the GPS screen can be viewed whilst the case is being used, Others come with an integral belt clip.

#### **Bike Mounts**

These are designed to provide a secure home for your GPS whilst you are biking with a quick release feature to keep your receiver safe when you park up.
