Walkingworld now offers over 4000 walks to choose from

Going on a break or holiday and not sure what walks are available where you are staying? Then we recommend that you take a look at [Walkingworld](#), for a relatively small annual fee or a single payment you gain access to a database of over 4000 walks nationwide.

To choose a walk you simply enter the location, OS grid reference or post code to find walks within 50 miles of that point. You'll be spoilt for choice with walks graded from a gentle stroll to mountain challenges; each walk has a brief description and a tab that takes you though to a more detailed information page.

The site allows you to choose if you want to include a summary, map, picture sheet, or walk steps in a PDF of the walk you require, then all you have to do is save this along with a Memory-Map route file to your PC, the mmo file when opened will allow you to transfer the coordinates directly to your GPS or PND.

As each walk comes with a proper OS map, when you combine GPS & map you have all the tools you need to follow the route even in totally unfamiliar territory. We think it's the perfect way to explore new areas of countryside previously unvisited.

Save £59.99 on RRP of Topo regions (RRP £79.99) – our price while stocks last £20 each

Region 4 – South & Central Scotland
