

Satmap Active 10/12/20 Training Day

All you need to get the best from your Active 10/12/20 GPS, Xpedition and SatSYNC Software

This training day is designed to introduce you to the principals of GPS Navigation using your Active 10/12/20 and how you could use GPS as an aid to navigation at home or abroad. The day will be a practical hands-on training day.

Tea & Coffee supplied morning & afternoon – Please bring your own lunch

Morning 9.30am to 12.30pm approx

- GPS Basics + Terminology
- Installing map cards and batteries – Charging your Device
- Device Start-up
- Overview of the buttons on your device
- Quick run through the Primary Pages
- Important Device Settings
- Before You Go – Calibrate your compass reset log & record your trip
- Map Page Overview
- Find out where to find a location fix
- Adding Points of interest (POI / Waypoints)
- Navigating to POI's

Afternoon 1pm to 4.00pm approx.

- Demonstration of SatSYNC and Xpedition Software
- How to create a Route in your GPS Device & Navigate it
- Navigating a Route that has been created in Xpedition
- Using your recorded trail to perform a reverse trackback
- Saving your trail at the end of a walk

This is a flexible plan with regard to time but we will aim to cover all points during the day
GPST will provide you with GPS Setup & Software starter guides that you can take away with you.
